M&P® 9 Metal M2.0®**

13974

SKU

9mm Luger

CALIBER

4.8"

BARREL LENGTH

17 or 23 rounds

CAPACITY

FEATURE

BENEFIT

Threaded Barrel with Compensator Attached

With strategic ports, the new compensator designed by Faxon® in partnership with Smith & Wesson®, gives you noticeably less felt recoil, as well as muzzle flip meaning faster follow-up shots and good target acquisition.

Aggressive Slide Design

Lightening cuts in the slide help aid in cycling while being compensated, giving you more reliability.

Optimized for Accessories and Performance

Included on the Spec Series is our C.O.R.E.™ system for mounting red dots, and suppressor height sights that are great for co-witnessing or keeping a sight picture with the use of a suppressor.
